

Maths Lessons

Maths will be taught in mixed ability classes and will cover the breadth of the curriculum expectations. There will be a focus on reasoning and use of resources. 'Fast Maths' will also happen weekly but outside of the Maths lessons. This will focus on the children achieving mastery across some fundamentals, which will ensure that they make better progress overall. Fundamentals refer to addition of two 1-digit numbers and times tables with the main aim being accuracy, followed by speed. Please help your child by asking them to recite their times tables frequently and ask quick fire questions on table facts and the associated division facts. If this is a challenge at this point then basic counting and adding of 1 and 10 to 2 digit numbers or counting in 2, 5, 10 would be highly beneficial.

Year 3 Autumn Term 2018

Oceans and Aliens

Guided reading:

Guided reading sessions will take place 4 times a week, as well as five English lessons. During these sessions, children will take part in focused reading activities to develop their understanding of different text types and become immersed in a class text. They will be encouraged to ask questions about what they are reading, predicting and interpreting meaning, as well as encountering new vocabulary.

Library:

Children are allowed to take home two library books and are expected to read daily for 10 minutes, recording their independent reading as SSR (Sustained Silent Reading) in their reading diary. Despite children being encouraged to read independently for enjoyment, it is also essential at this stage that they read every night ***with an adult***. This is to provide them with support to correct their reading errors, improve their fluency and accuracy and allow questions to be asked of them to check their comprehension of what they are reading. Diaries need to be signed by an adult at the end of every week for checking by teachers on Fridays.

Phonics:

All children have been reassessed on their phonics and have been grouped according to their specific needs. Phonics takes place 4 times a week in the morning for 25 minutes before guided reading. Children will be focusing on recapping the sounds and basic spelling patterns needed for their phase and will be moved fluidly between the phases as they progress. It would be appreciated if you could practise the alphabet with your children ensuring they know the sounds and letter names as well as encouraging them to apply their phonics by segmenting and blending words when reading and spelling.

Homework:

Pupils are expected to read regularly and to record their reading as detailed above. Spellings will be learnt as part of the children's phonics teaching and through fast spelling. Fast spelling allows the children to practise rewriting their spellings in a given time to improve accuracy and speed. These may be sent home at times to practise if children are still finding them a challenge.

Homework will be given in the form of a project each half term that is closely linked to, and enhances, what they are learning in school. Guidance will be issued to support the project and teachers are available to give advice when needed. If your child wishes to use the school computers, internet access and resources during their break times they are more than welcome. Please encourage them to ask their teacher if this is the case.

Please speak to your child's class teacher, in the first instance, or the year manager if you have any concerns or problems and we will do our best to solve the issue promptly.

Please read this guide carefully. It is intended to help you to assist your son or daughter with their studies and is an extension of our home-school partnership. In such a small leaflet, we can only give a brief outline but we hope it will give some idea of the areas that we shall be looking at this term.

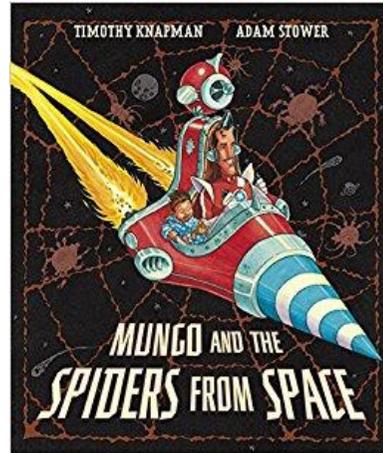

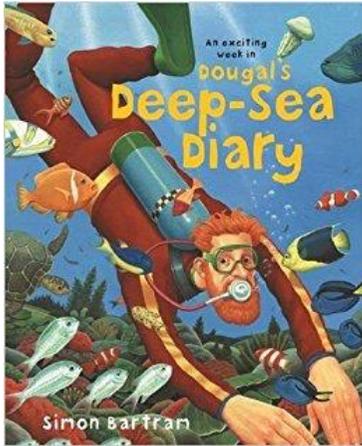

YEAR 3 STAFF

Nightingales - Miss Meikle - Year Manager/LKS2 Leader

Wrens - Mrs Graban

Sparrows - Mr Bowskill

Blackbirds - Miss King

Here is a brief outline indicating what your son or daughter will be learning this term in the various subject areas...

English:

Much of the English work will be directly related to their topics on Oceans and Aliens. Weekly work on handwriting and grammar will be integrated into the sessions in order to provide the children with a balance of text, sentence and word level learning. Handwriting will be a key focus in the beginning in order to encourage the children to improve their fluency, legibility and speed in writing which needs to be joined. Mastery of joined handwriting by the end of Y3 is expected by all pupils.

Spelling

- * to recap areas from the National Curriculum for Year 2 that have not been retained.
- * to learn the recommended spelling patterns in the National Curriculum for Year 3 - overviews will be provided each half term of words being learnt.

Grammar

- * reinforcing non-negotiable: capital letters and full stops
- * introducing the use of new punctuation: !? “” , in a list
- * improve understanding of word types: nouns, verbs, adjectives, connectives, prepositions
- * introduce the use of a thesaurus and dictionary in order to expand and improve vocabulary

Mathematics:

The current curriculum for Maths contains a higher percentage of number work and more focus on using and applying what the children can do mathematically in investigations and problem solving scenarios. This is taught through our Maths No Problem program which was introduced over a year ago which has shown great success. This term will mainly consist of number work from understanding the value of digits in our place value work, ordering and comparing numbers and rounding numbers up to 1000, as well as understanding how to use tools to support our learning. We will also then be progressing to looking at addition, subtraction, multiplication and division with mental maths and formal written methods. Most children are expected to be able to partition numbers, add and subtract 1 and 10 from any 2-digit number and count in multiples of 2,5, and 10 by the end of year 2 so please reinforce these with your children. Year 3 will cover 3, 4 and 8 timetables and will include numbers to 1000.

Topic Work:

Our curriculum is 'Topic' based, enabling the children to make more meaningful links between their learning across different parts of the curriculum. A topic will last half a term allowing the children to cover six topics over the year. This half term our focus is on 'Oceans' followed by 'Aliens' next half term. This will involve a wide array of activities including creating comics using comic life as part of ICT, learning about different geographical aspects such as continents and oceans and applying their creativity to design pop art and their own deep sea vehicles in DT!

Games and P.E. - Children will have two sessions per week. This is a compulsory part of the curriculum and so it is essential children always have appropriate kit available in school. Kits should all be brought in on a Monday. After an afternoon PE session, children will be sent home in their kit and are expected to bring it back the following day. Children are sent home in kit to ensure they do not waste excessive amounts of their lesson time changing. School is exploring the introduction of a new concept called 'PE Ready' where children will come to school in PE kit on their PE days and go home in their kit. Further details will follow.

Core Learning - Being a good team member and how to work effectively as a team.

PHSEE This is embedded within our daily teaching and Core Skills curriculum. Each half term has a different focus. This is introduced to the children in assemblies and the skills are developed through weekly, in-class activities.

Geography/History -

Ocean explorers, continents, ocean location and depths,

Science: Light and Shadows, Rocks and Soils

ICT Importing images/presenting in pages/Comic life

ART - Sketching skills, collage, wire shaping, mixed media (pop art)
